PROJECTS

PROJECTS -

Car Sales During Covid | https://github.com/Kpearson72/Car_Industry_During_Covid

Project Hypothesis COVID trend, Interest rate trend, Unemployment trend, and Consumer Sentiment trend were each visualized to easily observe which factors explain the change in consumer behavior towards car sales. Covid-19 is the precipitating event that influenced each factor.

- Technologies Used: Jupyter notebook, Pandas

Web-Design-Challenge | <https://github.com/Kpearson72/Web-Design-Challenge> | **github page:**
<https://kpearson72.github.io/Web-Visualization-Dashboard-Latitude-/>

Creating a visualization dashboard website using visualizations we've created in a past assignment

- Technologies Used: Jupyter notebook, HTML, CSS

Python API Homework - What's the Weather Like -Latitude Analysis Dashboard | <https://github.com/Kpearson72/python-api-challenge>

The task was to create a Python script to visualize the weather of 500+ cities across the world of varying distance from the equator.

- Technologies Used: Jupyter notebook

ETL-Project | <https://github.com/Kpearson72/etl-project-team4>

Covid 19 Happiness Database compiles data from countries around the world and can be used to see how Covid-19 factors affect the happiness score of that population.

- Technologies Used: Jupyter notebook, HTML, CSS, Mongo Compass, PgAdmin, PostgreSQL

EXPERIENCE
